UV PROCESS SUPPLY INTRODUCES THE WIDE AREA FLOOD CURING LAMP

CHICAGO, October 12, 2005 – The CON-TROL-CURE® Wide Area Flood Curing Lamp is a UV Process Supply exclusive and is ideal for UV curing an expansive area. Fitted with adjustable lamp holders, this new, large area UV Flood housing can accommodate lamps with a total power from 250W up to 1,000W.

This unit casts an even irradiance over a wide area. Placed at a distance of 3 feet from the material to be cured, the Wide Area Flood Curing Lamp projects an effective cure area of at least 5 feet by 5 feet. The lamp housing can sit on a floor and shine up onto a wall. It can also be mounted in almost any other position required, using your own stand and/or supports.

The 800-1600W power supply that accompanies each system is based on the lamp power required. There is an optional upgrade to 230V, 50Hz for those requiring international power capabilities.

POTENTIAL CURING APPLICATIONS

- 3D objects
- Walls
- Automotive components
- Guitars
- And much more

FEATURES

- Special angled reflector housing provides a wide flood path of UV energy
- Easy installation, floor standing, wall or ceiling mountable.
- One medium pressure Iron Additive lamp is included

Since 1979, UV Process Supply has provided goods and services for the UV curing market. These products reinforce UV Process Supply's position as *the complete source for all your UV curing needs.*
