

DELUXE SPILL KIT

Protect Your Plant and Employees From Dangerous Materials While Simplifying the Clean-up Process of Spilled UV Inks and Coatings.

A UV material spill can quickly turn into a hazardous, hard-to-contain mess -- without the right Spill Kit on hand. The Deluxe UV Spill Kit, packed with a variety of absorbents, provides quick containment and efficient spill clean-up and disposal.

This kit is specifically designed to facilitate the rapid clean-up of UV material spills. The Deluxe Spill Kit was custom designed for both efficient UV material clean-up as well as personal safety considerations. This dynamic kit offers six complete personal safety suits so one person can clean-up numerous small spills; or alternatively, so multiple people can work to prevent a single large-scale spill from getting out of control. Absorbs 5 gallons of spilled material.

The spill kit is designed to take care of any type of spill. It offers a combination of spill socks for use in larger spills and containment, granules for wide spread spills and hard to reach spaces, and absorbent towels for small messes and spills on sensitive equipment.

This complete kit cares for all aspects of a spill...

SPILL CLEAN-UP:

- 10 lbs of absorbent UV spill clean-up granules
- 1 package of disposable print-press safe absorbent towels
- A special, high-walled plastic scoop with funnelling capabilities
- 2 secure plastic trash bags for proper waste disposal
- 8 spill clean-up socks

PERSONAL CLEAN-UP SAFETY:

- 6 pairs of disposable gloves protecting against direct skin contact
- 6 disposable aprons to protect clothing from contact
- 6 disposable face masks to safeguard against fumes and splash
- A pair of chemical splash goggles to protect the eyes
- 6 pairs of disposable boots to prevent tracking and shoe contamination

All packed in a sturdy, resealable fiber drum.
