

UV Lamp Maintenance Kit

Removes lint, dust and foreign contaminants from UV lamps and reflectors to maintain peak operating efficiency and to extend lamp life

Regular maintenance is necessary to provide your UV system with full capacity lighting. UV Process Supply's Lamp/Reflector Maintenance Kit includes everything that you need to clean UV lamps and reflectors: cleaning fluid, wiper pads, cotton gloves, and shop maintenance information. Enough materials for several cleanings. Each individual item is described below:

CLEANING FLUID: Deterioration may be accelerated by outside cause, such as improper handling or cleaning. Lamps should be cleaned before operation. UV Process Supply's Cleaning Fluid is a liquid solution designed to clean the quartz glass and leave no contaminant residues behind.

LINT-FREE PADS: 4 x 4" pads feature are 100% cotton, nonwoven material. No binders or chemicals. Will not react or contaminate developing solutions or chemicals. Excellent wet strength, will not scratch. Highly absorbent. 100 per box.

COTTON GLOVES: 100% cotton, these gloves should be used to handle lamps. Failure to handle lamps with gloves after cleaning may result in fingerprints or smudges being etched into the lamp once it has been turned on.
