

# PORTABLE AIR CLEANER

## B092-001

### NEW LOW COST SOLUTION FOR AIR POLLUTION!

The PORTABLE AIR PURIFIER was created especially for the press room. It was designed to clear the air of smoke, chemical fumes and odors particularly prevalent in printing shops.

Unlike other appliances that electronically collect dust, pollen, and smoke particles, the PORTABLE AIR CLEANER filters all of the air in the press room through 340 cubic inches or 5 1/2 lbs. of activated charcoal. The activated charcoal acts like tiny magnets that attract chemical fumes and odors. This magnetic action is called adsorption and makes activated charcoal the most effective means of purifying the air. The washable dust filter traps paper dust and press powder.

The PORTABLE AIR CLEANER provides two speed operation and is as economical to operate as a 150 watt light bulb.

The PORTABLE AIR CLEANER will service a press room up to 1,000 square feet, replacing the unpleasant air with clean healthful air every 10-15 minutes at high speed. If the press room is larger than 1,000 square feet, two units may be required.

The PORTABLE AIR CLEANER is competitively priced, quiet running, economical, and outperforms all others, making it the best choice in air filtration equipment.

#### Specifications:

- 2 speed: 400 or 600 cu.ft. per minute
- Completely portable
- Economical, Hi speed- 135 watts, Low speed- 90 watts
- 340 CU. IN. (5.5 lbs) activated charcoal
- Services a room 1,000 square feet
- 360 degree filtration
- Washable dust pre-filter
- Low maintenance
- One year warranty
- 16.5" Dia. X 15" High

#### Absorbs:

- Cigarette smoke
- Chemical fumes
- Odors

#### Filters:

- Press powder
- Paper dust
- Pollen
